

Ček lista vlog (avtor: Frances Oakley; prevedla mag. N.Gričar)

Ozadje

Vloge pomagajo pri oblikovanju posameznikove identitete, izražanja socialnih pričakovanj glede izvajanja, organizaciji porabe časa in vključevanja posameznika v socialno strukturo. Posebnost delovno terapevtskega pogleda na nezmožnost je razumevanje kako bolezen ali poškodba vpliva na izvajanje okupacijskih vlog. Uspešna adaptacija po bolezni ali poškodbi je odvisna od posameznikovih sposobnosti, kako kompetentno ponovno prevzame prejšnje vloge ali sprejme nove okupacijske vloge.

Ček lista vlog ima namen zbiranja informacij o posameznikovih okupacijskih vlogah. Okupacijske vloge so prisotne tako na področju sprostitev, zabave kot na področju produktivnosti. Sprostitev, zabava se nanaša na področje "brez dela" kot so hobiji, šport, rekreacija. Produktivnost pa vsebuje določena dela ali usluge, ki jih nekateri potrebujejo ali želijo.

Ček lista vlog je bila za mednarodno uporabo prevedena v enajst jezikov (arabski, nizozemski, francoski, nemški, japonski, portugalski, španski, švedski, kitajski in hebrejski, slovenski). Je zanesljiv in veljaven ocenjevalni instrument, ki zagotavlja:

1. Podatke o posameznikovem zaznavanju svojega vključevanja v vloge skozi različna življenjska obdobja.
2. Podatke o stopnji pomembnosti posamezne vloge.
3. Dodatno informacijo glede posameznikovih sposobnosti ohranjanja ravnotežja med posameznimi vlogami.

Opis ček liste vlog

Ček lista vlog je ocenjevalni instrument v pisni obliki in zahteva približno 15 minut časa. Primerna je za uporabo pri mladostnikih, odraslih ali starejši populaciji. Sestavljen je iz dveh delov. Prvi del ocenjuje prisotnost najpogostejših vlog v posameznikovem vsakdanjem življenju v določenem časovnem obdobju (preteklost, sedanost in prihodnost).

Drugi del ocenjuje stopnjo pomembnosti posamezne vloge.

V ček listi so vključene naslednje vloge: študent/ka, delavec/, prostovoljec/ka, skrbnik/ka, vzdrževalec doma, prijatelj, družinski član, vernik/ka, konjičkar (kdor v prostem času opravlja svoje najljubše delo), član organizacij. Vključena pa je tudi kategorija "drugo", kjer se lahko dopiše vloge, ki niso na seznamu. Namen ček liste je določiti vloge, ki imajo okupacijsko komponento in organizirajo posameznikovo vsakdanje življenje. Pravilo glede pogostosti izvajanja določene vloge je napisana pri opisu vsake vloge. Na primer: vloga družinski član se nanaša na skupno preživljvanje časa ali početi kaj skupaj z družinskimi člani (kot so: zakonec, otrok, starš ali drugi sorodniki) *vsaj enkrat tedensko*. Torej *enkrat tedensko* je pravilo glede frekvence pri tej vlogi.

Ljudje namreč lahko vidijo sebe kot družinskega člana, vendar njegova družina živi zunaj mesta in nimajo rednih stikov. Posledično ta vloga ni prisotna pri organizaciji trenutnega vsakdanjega življenja.

Izpolnjevanje ček liste vlog

Posamezniku dajte navodilo naj izpolni demografične podatke na začetku ček liste. Ostanite pri njemu dokler ne izpolni ček liste v celoti.

1. del

1. Prosrite ga/jo naj prebere navodila.
2. Preverite, če razume navodila. Postavite mu kakšno vprašanje, ki se nanaša na izpolnjevanje 1. dela..

2. Preverite, če razume navodila. Postavite mu kakšno vprašanje, ki se nanaša na izpolnjevanje 2. dela..
